mohith4488@gmail.com

Summary

Software Engineer with 3 years of industry experience and an M.S. in Computer Science from The University of Texas at Arlington. Experienced in machine learning, deep learning, computer vision, full-stack development, and enterprise software systems. Skilled in building scalable AI solutions, optimizing model performance, and developing data-driven applications using Python, TensorFlow, Angular, Django, and cloud technologies.

Education

The University of Texas at Arlington	M.S. in Computer Science	GPA: 3.6/4.0	Graduated: May 2026
Visvesvaraya Technological University	B.E. in Computer Science and Engineering	GPA: 9.03/10	Graduated: August 2021

Skills

Programming: Python, Java, C, C++, SQL **Machine Learning AI:** Machine Learning, Deep Learning, Computer Vision, CNNs, Transfer Learning, Feature Extraction, Model Evaluation, Scikit-Learn **Frameworks** **Tools:** TensorFlow, OpenCV, Django, Angular, Git, Jupyter Notebook, Power BI **Cloud DevOps:** AWS, Docker, REST APIs **Databases:** Oracle SQL, MS SQL Server, PostgreSQL

Experience

Software Engineer	ALTEN Global Technologies Pvt. Ltd., Bengaluru	09/2022 – 05/2024
- Developed CNN-based computer vision solutions for ADAS, face-mask compliance, and ship detection applications. - Improved object detection accuracy by approximately 20 - Built scalable image preprocessing and feature extraction pipelines to support machine learning workflows. - Deployed and validated real-time inference systems for proof-of-concept and production-focused demonstrations. - Collaborated with cross-functional engineering teams to evaluate model performance and deployment feasibility.		
Associate Professional Software Engineer	DXC Technology, Bengaluru	08/2021 – 08/2022
- Conducted REST API performance testing and SLA validation for enterprise applications. - Identified application and database performance bottlenecks using monitoring and load-testing tools. - Generated performance analysis and capacity-planning reports supporting system optimization efforts. - Worked with development teams to improve response times and overall system reliability.		

Projects

Caltech-256 Object Recognition and Clustering	09/2025 – 12/2025
- Fine-tuned ResNet-50 and custom Fractal CNN architectures on the Caltech-256 dataset for multi-class image classification. - Applied transfer learning, feature extraction, and data augmentation techniques to improve model performance. - Extracted deep feature embeddings and performed K-Means clustering for unsupervised image grouping. - Evaluated clustering quality using linear probing and comparative performance analysis.	
Online Shopping Revenue Prediction using KNN	10/2025 – 12/2025
- Built a K-Nearest Neighbors classification model to predict customer purchase behavior from e-commerce session data. - Applied feature scaling, preprocessing, and hyperparameter tuning to improve prediction accuracy. - Evaluated model performance using confusion matrices, accuracy metrics, and classification reports.	
AI-Powered Meal Preparation Application	01/2025 – 05/2025
- Developed a full-stack meal planning application using Angular, Python, PostgreSQL, and Generative AI APIs. - Implemented AI-driven meal recommendations, recipe generation, and grocery list management. - Designed relational database schemas and RESTful APIs to support scalable application functionality.	
Cricket Stadium Management Dashboard	08/2024 – 12/2024
- Designed an EER model and relational database schema for stadium operations and booking management. - Developed SQL queries for revenue tracking, attendance analytics, and customer booking insights. - Built interactive Power BI dashboards enabling operational reporting and business intelligence visualization.	

Certifications

- AWS Machine Learning and Artificial Intelligence Foundations
- Databricks Fundamentals Certification
- Machine Learning Certification – Analytics Vidhya
- Full Stack Development Certification – Simplilearn
- Full Stack Development Program – GeeksforGeeks
